

well crafted water fixtures

®

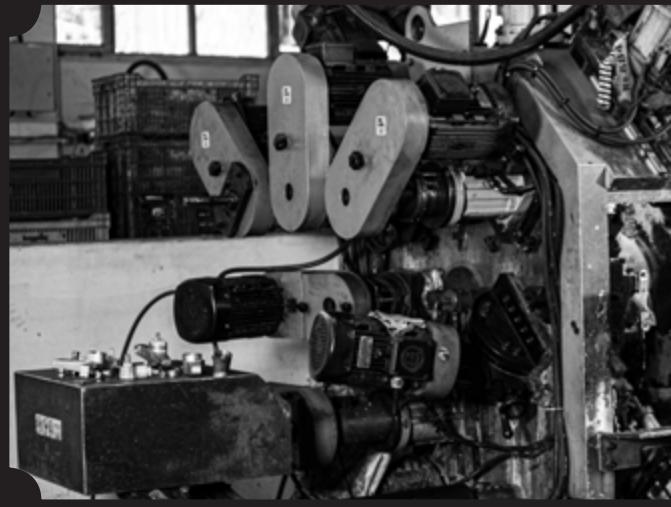

Water is life – and life on earth is linked to water. Our existence is dependent on water, or the lack of it, in many ways, and one could say that our whole civilization is built on the use of water.

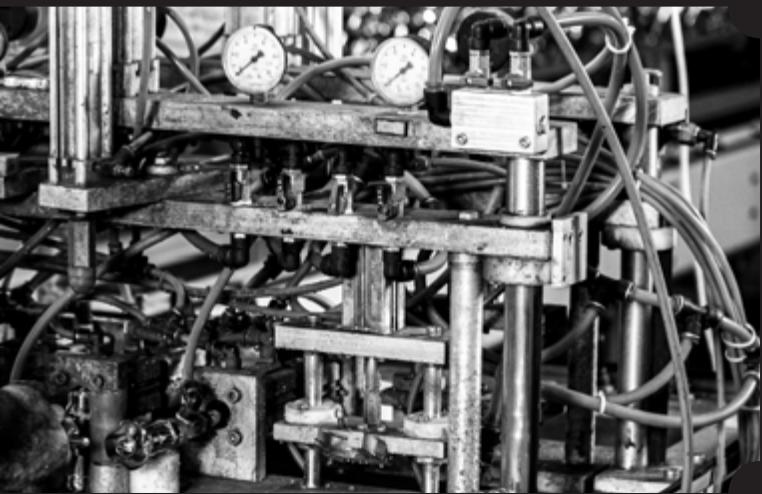

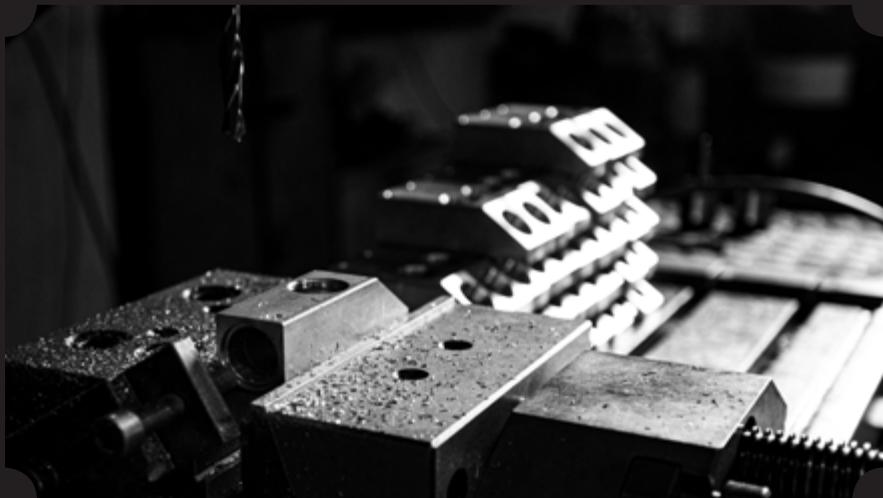

In ancient Greek, it was a tradition to offer a bath to guests. In ancient Roman culture, every town had public baths and bathing played a major role in daily life.

When it comes to Ottoman era, these public baths emerged as Hammams. In vast history of Anatolia, starting from prehistoric ages, diverting water into the use of daily life of the society became an art and the heart of the civilization.

Thanks to cradle of civilization we are living on today, we admix the spirit of the inheritance of our ancestors into our well-crafted products to divert and use water better in daily life.
